## EDUCATION

**Carleton University,**
**Bachelor of Computer Science**
CGPA: 3.7/4

**May 2019 — Jun 2022**

## PROFESSIONAL SUMMARY

Young and passionate Full Stack developer with 1 year of industry experience creating fully functions and properly designed front-end and back-end applications. Looking for opportunities to further develop my skillset or gain new skills.

## SKILLS

**Programming Languages:** Java, C++, ASP.NET Core, SQL, CSS, JavaScript, TypeScript, Node.js, Bash.

**Technologies:** React, Angular, Node, Spring Boot, RESTful services, Agile.

## EXPERIENCE

**Full Stack Developer**
Infosys Ltd

**Jun 2022 — Present**
Remote

- Collaborated with team members to improve operations for the client by developing a Full stack Application using Angular and .NET to make sales, record purchases and manage customer rewards.
- Strengthened application security by implementing input verification techniques to mitigate vulnerabilities.
- Wrote multiple stored procedures to reduce network traffic by 5%.
- Worked with mentors during the process of the development of SDLC and participated in daily sprint planning.

**Teaching Assistant**
Carleton University

**Sept 2021 — Apr 2022**
Ottawa

- Oversaw classes of up to 260 students in Web Development.
- Helped students design front end applications using React and host their projects on the web using tools like Heroku.
- Created additional materials to help students learn RESTful design outside of course descriptions.
- Provided timely guidance and mentorship to ensure the class average was well above 70%.

## PROJECTS

**Nigerian Children's Hospital**

**May 2023**

- Designed and created a front-end web application using React.
- Successfully integrated payment forms for donations using Stripe Payment API.
- Protected website from bots and spam by implementing Google reCAPTCHA.

**Family Chore**

**Dec 2021**

- Developed a mobile app based on React Native to allow a household to effectively manage chores.
- Designed the UI using Figma.
- Implemented Redux for transient app state.
- Integrated React Native libraries such as react-navigation, react-native-firebase.
